**Healthcare Industry Veterans Found Lumina Health Partners Consulting Group**

**Firm launches website that features insights from Lumina consultants**

CHICAGO, Sept. 12, 2018—Healthcare industry veterans Daniel Marino and Lucy Zielinski have co-founded Lumina Health Partners, a Chicago-based consulting firm that offers business advisory and leadership solutions to healthcare organizations.

The firm’s experienced team of consultants works hand-in-hand with clients to develop transformative results for the most difficult value-based strategy, digital innovation and analytics, clinical transformation, and leadership and governance challenges. Using a “lead to support” approach, the firm’s consultants create and activate strategies and plans that enable medical groups, hospitals, and health systems to realize measurable strategic, financial, clinical, and operational goals.

“We are excited to provide our clients with direct access to a blend of advisory services and leadership training necessary for success in today’s healthcare environment,” Marino said. “We have a team of outstanding industry experts that enable long-term success for organizations, not only through analytics and technology, but also through clinical transformation and change management.”

Zielinski added, “Healthcare organizations are experiencing much change, and we are proud to be recognized as a trusted partner as we help our clients navigate this change and focus on real results. We believe our key differentiator is the integration of technical solutions with change management and people skills, allowing our clients to be better equipped to transform the delivery of care.”

Lumina Health Partners’ core values include collaboration, partnership, integrity, value creation, innovation, and giving back. Consultants work in partnership with clients to develop custom solutions that are based uniquely on their needs and with deep respect for their resources and reputation. They

create and deliver value for clients with a focus on innovation, sound strategy, and quick execution, as well as coaching and support for future leaders.
